Integration Solutions for the Telecom & Energy Industries

RAPID DEVELOPMENT

AND INTEGRATION OF SECURE OUTDOOR **ENCLOSURE PRODUCTS**

Eligré Systems is your source for innovative telecom enclosure and housing technologies. At Eligré, our team focuses on developing total solutions for clients that meet manufacturing, supply chain, and installation requirements, giving you a single solution that will help your company rise above the competition.

ES1-001

ES1-002

ES1-003

Our solutions combine robust construction with ease of installation and service into a single solution for all outdoor enclosure deployments. For unique applications, Eligré's team of electrical and mechanical engineers are experienced with decisive, practical design techniques that meet the needs of the telecom and energy industries.

Eligré operates two production facilities, located in the West and Midwest, which provide the ability to regionalize production, reducing shipping costs and increasing flexibility in production capacity. Our company's manufacturing processes are ISO Certified ensuring that we provide consistent, reliable quality to our valued clients.

ELIGRÉ'S TEAM CONSISTS OF SKILLED ENGINEERS, SUPPORT STAFF AND INDUSTRY EXPERTS

Eligré Systems' remote access cabinets combine robust construction with ease of installation and service into a single solution for all outdoor telecommunications. Constructed of welded aluminum sheet, durable polyester powder paint coating, stainless steel hardware and fasteners, and a fully insulated interior, these cabinets are engineered for years of trouble-free performance in the most demanding conditions.

All our products are climate-controlled using energy efficient air conditioners and/or thermal systems. The ES1 Series offers convenience and quality for the quick-start installation. For custom needs, Eligré's team of experts is available as an extension of your staff to design unique configurations and integration solutions to meet your exact requirements. Contact your sales representative for full product details.

OUR SOLUTIONS GIVE YOU CUTTING-EDGE PERFORMANCE

AT ELIGRÉ, WE KNOW THAT OUR #1 GOAL IS TO HELP CLIENTS DEVELOP SOLUTIONS THAT PROVIDE THEM WITH AN EDGE OVER THEIR COMPETITION.

Eligré Systems' *Rapid Deployment* program takes all the headache out of product development and installation for our valued clients. We have a library of standard product solutions available to fulfill a wide variety of outdoor enclosure applications. With multiple manufacturing facilities strategically located to serve clients regionally, Eligré effectively reduces shipping and delivery time to your location. Additionally, our ES1 Product Series is designed with rapid, efficient installation and mounting capabilities, minimizing the on-site time and staff required for the integration process.

SOLUTION INTEGRATION

We take pride in working with clients to provide solutions to help give you an advantage in the marketplace. Our integration services include component selection, wire harness development, bonding and grounding, alarms, power systems, and installation. Logistically, Eligré can accept orders from multiple locations or channels and ship directly to any global location. Additionally, we provide inventory management options to make sure that your product is ready at a moments notice for urgent circumstances.

PRODUCTS AND SERVICES

PRODUCT SOLUTIONS

Eligré's standard product offerings include industrial enclosures, climate controlled enclosures, corrosion resistant enclosures, freestanding or mounted enclosures, and custom enclosures.

CUSTOM SOLUTIONS

Comprehensive support from Eligré's service representatives, engineers, and industry experts develop solutions for your unique requirements.

CONFIGURATIONS

Custom configurations are available on all our products, including battery capacity, pole or wall mount, plinth base, etc.

ENGINEERING

Eligré's engineers work with you throughout the entire design process - stage gate, design reviews, DFM & DFT, verification and validation.

ELECTRICAL TESTING

Providing functional testing to verify operation and optimize test cost versus coverage.

OUTDOOR APPLICATIONS

Eligré's outdoor enclosures protect electronic equipment at remote sites from an array of situations, from basic needs such as climate and water protection, to other needs such as safety and vandalism deterrents.

RAPID DEPLOYMENT

Rapid Deployment is vital to providing superior service to clients. Eligré simplifies the entire production process and supply chain to get your products to location as fast as possible.

INSTALLATION

Our industry experts contribute in risk analysis, process capability studies, SOPC, Gage R&R.

SUPPLY CHAIN MANAGEMENT

Managing systems to achieve cost effective products, reduced cycle times, and JIT rapid solution deployments to meet client needs. Consignment assembly and installation services also available.
